

```
1 1. Create a number guessing game.
2 -----
3 System will generate a number randomly between 1 and 10 and keep it
4 The user have to guess this number in 5 attempts.
5 If the guess is +- 9,8 numbers away, it is 'very cold'
6 If the guess is +- 7,6 numbers away, it is 'cold'
7 If the guess is +- 5,4 numbers away, it is 'neutral'
8 If the guess is +- 3 numbers away, it is 'warm'
9 If the guess is +- 2 numbers away, it is 'hot'
10 If the guess is a match, should give the message 'Its a match! Congrats', play again
11 The response of the computer should be like
12
13 1.Start the Game
14 2.Exit
15
16 I've already guessed one.
17 Enter your guess: 2
18
19
20 Your guess is warm from left and cold from right. Try again
21 Enter your guess: 3
22
23 Your guess is cold from left and warm from right. Try again
24 Enter your guess: 4
25
26 Your guess is cold from left and warm from right. Try again
27 Enter your guess: 6
28
29 Its a match! Congrats
30 1.Play again
31 2.Exit
32
33
34
35 2. Student report card management system
36 -----
37
38 This project requires managing student records. A student record contains a roll number,
39 name and marks obtained in maths, physics, chemistry, english and prgraming. The system
40 should be able to do the following
41 1. create a student record
42 2. delete a student record based on the roll number
43 3. modify the marks in a student record given in roll number
44 4. display all student records
45 5. display a students record based on the roll number
```
